

Louisiana Permitting Services

Experienced and connected permitting experts help keep your project on schedule.

Groundwater & Environmental Services, Inc. (GES) provides professional environmental consulting, engineering, remediation, and technical field services throughout the US, Puerto Rico, and the Caribbean. Our in-house scientists, engineers, consultants, and regulatory specialists are dedicated to problem solving, innovating, and delivering site-specific solutions for the organizations that count on us to tackle their most pressing environmental and infrastructure challenges.

For over 38 years, we have successfully obtained and facilitated permit approvals across a wide-range of industries and activities including: Oil & Gas Facilities; Terminals & Refineries; Industrial & Commercial Facilities; Pipelines, Energy Transmission Lines; and Commercial and Residential Developments.

Our Baton Rouge, Louisiana-based staff includes experts formerly with Louisiana Department of Natural Resources (LADNR), Louisiana Department of Environmental Quality (LDEQ) and Louisiana Department of Wildlife & Fisheries (LDWF). They prepare and complete permit applications, requests for modification, and closure for GES clients dealing with air, water quality, groundwater, solid and hazardous wastes, oil control, and waste management issues. Their wealth of expertise in Louisiana state and local permitting requirements ensures that your project will receive the approvals necessary to keep your project on schedule.
