

About GES

Firm Overview

Innovation, Quality, Value

Groundwater & Environmental Services, Inc., also known as GES, is a privately-owned firm staffed with talented environmental scientists, engineers, consultants, and hands-on technical specialists. We train and encourage our staff to be problem solvers, innovators, and trusted partners to the organizations that rely on us to tackle their most pressing environmental and infrastructure challenges.

For more than 40 years, GES has provided integrated environmental services that drive value for our clients across North America. We work in all 50 states, the District of Columbia, Puerto Rico, and the Caribbean. We work with the world's leading corporations and government agencies to develop cost-effective permitting, compliance, design, construction, remediation and operations solutions that carefully balance your infrastructure objectives with environmental risk and liability.

GES At-A-Glance
